22 Coal Miners Die In Illinois Explosion; 85 Others Trapped

CENTRALIA, Ill., March 25 (AP) - Twenty-two coal miners were reported tonight to have been killed in an underground explosion in mid-afternoon, and rescue teams were trying to get to scores of others trapped 540 feet below the surface.

Twenty-four miners had been brought out alive by 11:30 p. m. (Pottstown time) leaving 85 men unaccounted for. A total of 131 miners were in the mine when the explosion occurred.

Ed Wick, news editor of the Mt.-Carmel, Ill., Republican Register, said he heard Illinois State Mine Inspector Driscoll Scanlon tell State Police Capt. R. C. Winder that he counted 21 dead in the mine. The body of one other miner had already been recovered.

"It's as bad as it can be," the Mt. Carmel newspaper man said Scanlon reported. "The gas is so heavy another explosion could come momentarily.

Elmer N. Baird, face boss at the mine, said "There's no chance for the men still down there." More than 500 persons, including

some weeping women, crowded around the mine shaft as floodlights played on the scene, and ambulances were lined up for about a quarter

Police set up rope lines to keep the crowd back, but there was no

formation about the men below. An emergency medical center was established at the community center in Centralia, and as the miners still living were brought up on stretchers they were taken there and

to St. Mary's hospital. As the crowd surged around the mine entrance and watched as the rescue teams went in and came out, (Continued on Last Page)

Gale Uproots Trees, Causes Heavy Loss In Surrounding Area

(Mercury Staff Writer)

March, in its truest war-like tradition, roared its wrath at Pottstown yesterday as winds of gale-like force ripped through the area causing damage to property and power failures.

The gusts which reached 45 to 50 miles per hour, the strongest since the past Jan. 30. were accompanied by almost an RAPE SUSPECT inch of rain in early hours of the morning and snow flurries all afternoon as the mercury slid steadily all day from a high of 60.

About a dozen small power failures and two major ones were noted in addition to numerous trees which were blown down, one causing damage to a parked auto and blocking traffic, and damage to property

over the area. All street lights were off last night for 14 minutes when a fuse in the Philadelphia Electric plant blew because of a shortcircuit in the lines. Walter L. Foley, plant superintendent, said the fuse was replaced as soon as the black-out was noticed.

The Bethlehem Steel plant was without any power for half an hour yesterday afternoon from 2:30 to 3 o'clock when, it is believed, a high tension wire in the vicinity of Phoenixville was blown down. Foley said that between 2:30 p. m. and sunset, the windlest

period, about a dozen power failures were reported and repaired. Many homes in the Douglassville area were without electrical service for about an hour at noon when a tree on the property of A. Crisco, near Monocacy, toppled, felling

Meanwhile, the tax-slashing legislation was applauded by House Republicans as a boon to business prosperity, but assailed by Demomats as "a discriminatory patchwork of political expediency—neither equitable, timely, nor sound.

GOY members of the ways and means committee told the House, in a formal report, that Congress can make this income tax reduction and the Treasury still will have \$2,300,000,000 to \$3,800,000 000 to pay on the \$260,000,000,000 debt.

Nine of the ten committee Democrats issued a dissenting report saying the bill gives a windfall to the wealthiest taxpayers" They added that it may close the door against debt payment and prevent a balanced budget.

Some Democratic leaders are predicting a presidential veto if Congress passes the bill in its present form.

The rules committee today cleared the bill for presentation to the -House under a procedure whereby it must be approved as is, or not at all. This is the usual way of handling complicated tax bills.

YOUR HEALTH

By HERMAN N. BUNDESEN, M. D. MOST ulcers of the stomach or first part of the intestine can be treated successfully without operation. In fact, according to Dr. Edward A. Cooney, of Boston, about eight out of ten are of this type. In the remaining cases, however, complications arise which demand surgical treatment if life is to be saved.

Among such complications are perforation, obstruction, severe hemorrhage and recurrent bleeding. Then, too, there are many who believe that an ulcer, when present for a long time, may be a factor in the development of cancer.

Ulcers cause such symptoms as pain in the abdomen, sickness to the stomach and vomiting. The pain of ulcer usually comes on within one to three hours after eating and may be relieved by taking milk or some alkaline substance such as baking

But, when an ulcer perforates or eats through the wall of the stomach, the pain is extreme, striking suddenly and seeming to center in the p.t of the stomach. The muscles of the wall of the abdomen become rigid and hard.

This is a grave emergency and one requiring immediate operation in every case where the patient is in good enough condition to withstand it. The longer operation is delayed, the greater is the danger for the patient.

Before the operation is carried out, it say they're divorced, some say they're is advisable that the patient be given an about to be divorced and everyone else injection of sulfadiazine in solution into When Dave Appolon a vem. Scantily clad, she was carried to the police station by Robert H. Henjes, 25, her alleged boy friend, who said she was "wrecking" his yacht. Dashing out of the station, Maud led the police a merry chase, before capture. She was given a suspended sentence.
